

CONCEPT

WORKSTATION, TOWER

ConceptTower is a flexible electric workstation designed for industrial use in R&D, production, calibration and maintenance. It is also an excellent choice for training laboratories in vocational schools and higher education. An easy way to adapt one workstation for several users is to have it equipped with manual or electrical height adjustment. At the same time, electrical height adjustment enables the workstation to be suitable for standing work – ergonomics at its best.

Highlights

Upper shelves

More storage space

Instrument panel

Integration releases more space for working

Accessories

Versatile accessories make working routines easier

Table tops

More working space with 900 mm table top. Load capacity 500 kg evenly load

Full ESD protection for workbench

DEVICE PANEL

- Steel made panel for integrated electrical equipment
- Panel equipped with modular device system. Devices can be easily added and removed.
- Integrated modules are covered with polyester film to ensure long lifetime for the markings in the front panel.
- Panel top can be opened
- Height from the table top can be chosen freely
- LED lighting, sockets and connectors installed at the bottom of the panel

FLEXIBLE WORKSTATION

WORKSTATION FRAME

ConceptTower workstation is highly flexible. Tall perforated upright tubes, which enable accessory placement at any height. Workstation can be equipped for example with:

- 1 or 2 Instrument panels
- Table top, available with 1.5, 1.8 and 2.0 m width
- Back panels with hooks and pick-up boxes
- PC racks and monitor holders
- Adjustable tops
- Lighting

Strong metal construction provides a load capacity of 500 kg evenly load. In addition, all accessories are made of powder-painted steel guaranteeing a long lifetime for workstation.

TEKLAB also provides comprehensive ESD protection systems for workstations and users to limit the damages caused by electrostatic discharges.
